There is a new spirit prevailing throughout the State of Alabama—an awakening to the agricultural and industrial possibilities of the state—an appreciation of the progress that has been made and of the factors that have made this possible—and a realization that Alabama can be just as great as her people would have her be.

Those who know Alabama believe in her possibilities.

The Alabama State Fair this year will be a panoramic exhibit of the possibilities and the progress that has been made in agriculture, especially livestock, industry, education, commerce, home making arts, conservation of natural resources, and the other endeavors that go to make up our state. Thousands of prizes and awards will be given to exhibitors to stimulate interest in the growing of more and better agricultural products, the use of new products of industry, the improving of the home, and to inform and to encourage the young people of the state of ways by which to improve their opportunities. The young and old alike will see paraded before their eyes the wonders of their state and come away with a new hope and determination. The State Fair, October 2nd to 7th, this year, will be an educational, inspirational and recreational event and with the above Directors, Board of Advisors and Officers leading "Alabama on Parade" your State Fair this year will mark the beginning of a new era for Alabama.

MENU PRINTED ON ALABAMA PAPER
(*Tuscaloosa County*)

The greater Alabama State Fair this year is dedicated to the future possibilities of Alabama which offer challenge to the best that is within us. The hundreds of thousands of Alabama Citizens who will attend the State Fair this year will see paraded before their eyes:

ALABAMA AGRICULTURE ON PARADE—

Agriculture as it was, and a vision into what it will be; what can be done with livestock, poultry, swine, and other farm products. One of the most interesting and instructive attractions at the State Fair this year will be the elaborate exhibit being arranged by the Farm Extension Service and Department of Agriculture and Industry in the new and larger Agriculture Building.

ALABAMA INDUSTRY ON PARADE—

One of the most attractive exhibits ever arranged—a diorama of the State showing the abundant minerals, raw products, parks, forestry, wild life, and the other natural resources—is being prepared by the State Department of Conservation in the center section of the large Industrial Building. Around this interesting display will be the major industries of the State in attractive exhibits showing the many finished products made from Alabama resources, and the contribution of industry to the welfare of the State. Every exhibit is being carefully selected and arranged to put Alabama Industry on Parade in the most attractive display possible.

ALABAMA FOOD PRODUCTS ON PARADE—

Alabama has been called a veritable cornucopia and to show to the people of Alabama the hundreds of fine food products made in Alabama a separate section of the Grandstand Exhibit Hall is being given over this year to display Alabama Food Products on Parade.

The number and amount of prizes and awards have been greatly increased and the space enlarged in the Education, Home Economics, Poultry, Floriculture, Swine and Livestock Exhibits, to parade before the eyes of Alabama people the possibilities and the progress that has been made in these important endeavors. Many other attractive exhibits, among them being a 4-H Club Encampment and a Boy Scout Jamboree, to show to the boys from the Country and the City their respective activities, are being arranged. No effort or expense is being spared to make your State Fair this year the most enjoyable and constructive occasion in the history of Alabama. With the support of the people of Alabama and under the council and guidance of the Board of Advisors, the State Fair this year will truly be a greater "Alabama on Parade."
